

The Golden Arm of Your Farm

100% Natural Products

We are an ISO 9001:2015 certified, farmer-centric company, empowering farmers with quality products without any financial exploitation, enabling sustainable farming. We intend to revolutionize and push the agriculture industry in India towards sustainable farming through a research-based approach.

Vision

To promote sustainable farming.

Mission

Creating credibility in the farming community by producing quality products at the right price.

Why choose us

Research : Continuous Research on Product Development

Quality : On par with International Standards

Availability : Always in Stock and Well Distributed.

Pricing : Economical Pricing for the Quality

Benefits: Greater optimisation and efficiency in the use of the resources available for the crops (fertiliser, nutrients, water). Improvement of soil structure and increase of cation exchange capacity. Formation and development of an optimum and improve root systems maximum convenience and ease of handling due to the presentation in the form of soluble micro granules. Increases resistance against stress conditions (drought) and enhance water holding capacity of soil. RAINBOW Increases chlorophyll content increases photo synthetic activity of plant. RAINBOW increases nutrient up take of crops. improve flowers & Capsule form atom increases yield quality of crops increase beneficial micro-organics and metabolic activity.

Recommended Crops: Cotton, Chilli, Groundnut, Red gram, Bengal gram, Paddy & Other Horticulture Crops.

Usage: 2ml -2.5ml in 1 litre of water, Spray during morning or evening hours for best result. plant should be drenched thoroughly for effective result.

Available in: 250ml, 500ml, 1000ml

Benefits: Greater optimisation and efficiency in the use of the resources available for the crops (fertiliser, nutrients, water). Improvement of soil structure and increase of cation exchange capacity. Formation and development of an optimum and improve root systems maximum convenience and ease of handling due to the presentation in the form of soluble micro granules. Increases resistance against stress conditions (drought) and enhance water holding capacity of soil. Win Increases chlorophyll content increases photo synthetic activity of plant. Win increases nutrient up take of crops. improve flowers & Capsule form atom increases yield quality of crops increase beneficial micro-organics and metabolic activity.

Recommended crops: Cotton, Chilli, Groundnut, Red gram, Bengal gram, Paddy & Other Horticulture Crops.

Usage: 2ml -2.5ml in 1 litre of water, Spray during morning or evening hours for best result. plant should be drenched thoroughly for effective result.

Available in: 250ml, 500ml, 1000ml

Sunshine Is a Researched based product containing Nitro Benzene 20% with Naturally available protein it is a plant energizer, Flowering, Stimulant and yield booster. It enhances the plant canopy and induces professed flowering and thereby increase the yield, Mixing in the ration of 3-5 ml Sunshine in one litre of water of spray on crops.

Recommended crops: Cotton, Paddy, Chillies, Brinjal, Tomato, Bengal gram, Black Gram, Mango and other vegetable Crops. Spraying once in every 25 days after 15 days of sowing /transplantation increases the yield very significantly.

Usage: 2ml -2.5ml in 1 litre of water, Spray during morning or evening hours for best result. plant should be drenched thoroughly for effective result.

Available in: 250ml, 500ml, 1000ml

Benefits: Greater optimisation and efficiency in the use of the resources available for the crops (fertiliser, nutrients, water). Improvement of soil structure and increase of cation exchange capacity. Formation and development of an optimum and improve root systems maximum convenience and ease of handling due to the presentation in the form of soluble micro granules. Increases resistance against stress conditions (drought) and enhance water holding capacity of soil. Triveni Increases chlorophyll content increases photo synthetic activity of plant. Triveni increases nutrient up take of crops. improve flowers & Capsule form atom increases yield quality of crops increase beneficial micro-organics and metabolic activity.

Recommended crops: Cotton, Chilli, Groundnut, Red gram, Bengal gram, Paddy & Other Horticulture Crops.

Usage: 2ml -2.5ml in 1 litre of water, Spray during morning or evening hours for best result. plant should be drenched thoroughly for effective result.

Direction for use: Mix the suggested quantity in low mineral (soft) water and spray thoroughly covering entire plant.

Available in: 250ml, 500ml, 1000ml

KRYSTA FLOWER is helpful to help increase the number of flowers and plants rapid growth. KRYSTA FLOWER protects the plant from all condition. KRYSTA FLOWER induces healthy growth of the plants and helps to fight against various stresses. KRYSTA FLOWER is a Plant Bio stimulant based on succinic acid ascorbic acid and fulvic acid. KRYSTA FLOWER promotes the viral process of plants through better utilization of bio chemical reserves and help the plant to overcome constants during critical stages of growth it provides tolerance to the plant against environment stress and pest attack there by lead to normal functioning of plant systems and improves quality and yield of crops.

Recommended crops: Cotton, Chilli, Groundnut, Red gram, Bengal gram, Paddy & Other Horticulture Crops.

Usage: 1 ml in 1 litre of water, Spray during morning or evening hours for best result. plant should be drenched thoroughly for effective result.

Direction for use: Mix the suggested quantity in low mineral (soft) water and spray thoroughly covering entire plant.

Available in: 100ml

LAGAN is an Eco-Friendly Biologically Activated product. It is an excellent input in modern agriculture. It provides numerous benefits to crop production which are as follows:

1. It could largely stabilize nitrogen and release lock up phosphorus in soil and increase soil water holding capacity.
 2. It helps break up clay and compacted soils, assists in transferring micronutrients from the soil to the plant, enhances water retention, increases seed germination rates, penetration, and stimulates development of micro flora populations in soils.
 3. It act as a natural Chelator (by providing a high cationic exchange capacity) to improve the uptake of minerals, nutrients and trace elements by plants
- Direction of use Field tested on Crops such as Rice, orchards, cotton, chilies, banana, soybean, groundnut, vegetables, fruits, flowers, major plantation crops, medicinal and aromatic plants and all other crops specially high value crops.

Direction for use : Soil application: 1-1.5 Gram Per Litre Water. Foliar application: After 15 days of planting: Spray 10 grams in 15 Litres of water every 10-12 days interval till fruiting.

It is treated with Silicon Wetting Agent for Complete Wetting & Penetrating of the plants thus Low dosage is required and Faster Results with Complete Penetration.

Available in: 200 gm, 500 gm, 1 kg

CHAMP is combination of Super Potassium Humate and Fulvic Acid. It has excellent beneficial with nutrients and compost. Hence mix with vermicompost/microbial compost CHAMP.

CHAMP a unique soil conditioner, a naturally occurring organic substance consisting primarily of Humic Acid and minor level of minerals, gypsum and clays. The molecular structure of CHAMP provides numerous benefits to crop production. It eases organic material. Incorporation to soil, acceleration its decomposition & nutrient utilization and eventually increases the carbon content of the soil.

- CHAMP enhances decompositions and formation of organic matter in the soil.
- It helps soil desalination.
- It increases root mass and Brix level.
- It enhances vegetative growth.
- It increases organic (Carbon) percentage in the soil.
- It helps to increase water holding capacity of the soil and helps to resist drought.
- It increases aeration of soil, membranes permeability, plant respiration, photosynthesis cell division and enlargement.
- It improves soil humus structure and viability.
- It increases germination of seeds and viability.
- HUBEL is suitable for all kinds of crops:

Recommended Crop: Sugarcane, Cereals, Pulses, Oil Seeds, Fibrous Plant, Vegetables, Fruits, Flowers, Spices, Cash Crops, Plantation & Medicinal Crops and Kitchen Gardening.

Direction for use

For Spraying: 15-25 gm per 15 litre spray volume.

Soil Application Dose: Its directly related to the amount of organic matter of soil, if below 2%, then apply 8-12 kg per acre of plant, For sugarcane - apply 1 kg per 100 - 150 kg of chemical fertilize.

Available in: 1kg

Neem power is free from impurities. It is having Longer shelf & Highly Effective. Neem Power with Sweet and pleasant fragrance & 100 % bio degradable and environmentally Friendly. Neem power works as natural broad-spectrum insecticide & Effective over 600 species of pest's fungus.

Acts as an Insecticide / Fungicide / Miticide. *Neem oil is emulsifiable, eco-friendly, biodegradable.

*Contains Azadirachtin which repels/control aphids, black spot, rust, Spider mites, fleas, fungus gnats, white flies, mosquito and so on. *For Indoor/Outdoor Use on Fruits, Vegetables, Nuts, Herbs, Spices, roses, Houseplants, Flowers, Trees, Lawns and Shrubs.

Recommended crops: Cotton, Maize, Chilli, Paddy, Groundnut, Red gram & Other Vegetables.

Usage: 2 ml in 1 litre of water, Spray during morning or evening hours for best result. plant should be drenched thoroughly for effective result.

Direction for use: Mix the required quantity thoroughly in sufficient amount of water and spray on both sides of the leaves affected areas.

In cases of high-water hardness, good quality surfactant is advisable for better solubility.

Available in: 250ml, 500ml, 1000ml

Marvel is a natural plant source organic insecticide controlling piercing and all sucking pest with the advantages of high efficiency low toxicity and no residue. It is a 100% natural product. Marvel increases immunisation in plant. It promotes plant growth, induces flowering and thus result in growth and high yields.

Recommended crops: Cotton, Chilli, Groundnut, Red gram & Other Vegetables.

Usage: 2-2.5 ml in 1 litre of water, Spray during morning or evening hours for best result. plant should be drenched thoroughly for effective management of pest.

Direction for use: Mix the suggested quantity in low mineral (soft) water and spray thoroughly covering entire plant. Please note that high mineral content in water may cause some curd like formation due to the presence of fatty acid salts. Though it's not effects field performance.

Available in: 250ml, 500ml, 1000ml

King Mite is an organic product derived from plants that have components with Insecticidal properties for crop protection. It is a 100% natural product. King Mite increases immunisation in plant. It promotes plant growth, induces flowering and thus result in growth and high yields.

Recommended crops: Cotton, Chilli, Groundnut, Red gram & Other Vegetables.

Usage: 2-2.5 ml in 1 litre of water, Spray during morning or evening hours for best result. plant should be drenched thoroughly for effective management of pest.

Direction for use: Mix the suggested quantity in low mineral (soft) water and spray thoroughly covering entire plant. Please note that high mineral content in water may cause some curd like formation due to the presence of fatty acid salts. Though it's not effects field performance

AN ECO-FRIENDLY PRODUCT FOR AGRICULTURAL USE ONLY.

Available in: 250ml, 500ml, 1000ml

Thunder is an organic product derived from plants that have components with Insecticidal properties for crop protection. It is a 100% natural product. Thunder increases immunisation in plant. It promotes plant growth, induces flowering and thus result in growth and high yields.

Recommended crops: Cotton, Chilli, Groundnut, Red gram & Other Vegetables.

Usage: 2-2.5 ml in 1 litre of water, Spray during morning or evening hours for best result .plant should be drenched thoroughly for effective management of pest.

Direction for use: Mix the suggested quantity in low mineral (soft) water and spray thoroughly covering entire plant. Please note that high mineral content in water may cause some curd like formation due to the presence of fatty acid salts. Though it's not effects field performance

Available in: 250ml, 500ml, 1000ml

ECO Mite is an organic naturally derived botanical product from plants that have components with Insecticidal properties for crop protection. It is a 100% natural product. Which can improve the tolerance capacity in the plant. ECO Mite increases immunisation in plant. It promotes plant growth, induces flowering and thus result in growth and high yields.

Recommended crops: Cotton, Chilli, Groundnut, Red gram & Other Vegetables.

Usage: 1 ml in 1 litre of water, Spray during morning or evening hours for best result. plant should be drenched thoroughly for effective management of pest.

Direction for use: Mix the suggested quantity in low mineral (soft) water and spray thoroughly covering entire plant. Please note that high mineral content in water may cause some curd like formation due to the presence of fatty acid salts. Though it's not effects field performance

Available in: 100ml, 250ml

EXPERT is an advance bio technology research based product containing highly specialized bio components in natural form and, in such concentration, which gives very powerful action to management of plants. It is eco-friendly in natural and targeted pests will not be able to develop resistance against. EXPERT protects the plant from all conditions. EXPERT induces healthy growth of the plants and helps to fight against various stresses. EXPERT helps for quality and quantity of yield. EXPERT is nontoxic and safe to use.

Recommended crops: Cotton, Chilli, Groundnut, Red gram & Other Vegetables.

Usage: 2-2.5 ml in 1 litre of water, Spray during morning or evening hours for best result. plant should be drenched thoroughly for effective management of pest.

Direction for use: Mix the suggested quantity in low mineral (soft) water and spray thoroughly covering entire plant. Please note that high mineral content in water may cause some curd like formation due to the presence of fatty acid salts. Though it's not effects field performance

Available in: 100ml, 250ml, 500ml, 1000ml

Trishul is a natural plant source organic insecticide controlling piercing and all sucking pest with the advantages of high efficiency low toxicity and no residue. It is a 100% natural product. Trishul increases immunisation in plant. It promotes plant growth, induces flowering and thus result in growth and high yields.

Recommended crops: Cotton, Chilli, Groundnut, Red gram & Other Vegetables.

Usage: 2-2.5 ml in 1 litre of water, Spray during morning or evening hours for best result. plant should be drenched thoroughly for effective management of pest.

Direction for use: Mix the suggested quantity in low mineral (soft) water and spray thoroughly covering entire plant. Please note that high mineral content in water may cause some curd like formation due to the presence of fatty acid salts. Though it's not effects field performance.

Available in: 250ml, 500ml, 1000ml

All-in-One is a natural plant source organic insecticide controlling piercing and all sucking pest with the advantages of high efficiency low toxicity and no residue. It is a 100% natural product. All-in-One increases immunisation in plant. It promotes plant growth, induces flowering and thus result in growth and high yields.

Recommended crops: Cotton, Chilli, Groundnut, Red gram & Other Vegetables.

Usage: 2-2.5 ml in 1 litre of water, Spray during morning or evening hours for best result. plant should be drenched thoroughly for effective management of pest.

Direction for use: Mix the suggested quantity in low mineral (soft) water and spray thoroughly covering entire plant. Please note that high mineral content in water may cause some curd like formation due to the presence of fatty acid salts. Though it's not effects field performance.

Net Content : 100ml + 100ml + 50gm

Radiant is a unique product with available natural wide variety of plant chemicals. unique mixed formula refresh and regularize the plant metabolism and support for plant growth. It is a 100% natural product. Radiant increases immunisation in plant. It promotes plant growth, induces flowering and thus result in growth and high yields.

Recommended crops: Cotton, Maize, Chilli, Groundnut, Red gram & Other Vegetables.

Usage: 1 ml in 1 litre of water, Spray during morning or evening hours for best result. plant should be drenched thoroughly for effective management of pest.

Direction for use: Mix the suggested quantity in low mineral (soft) water and spray thoroughly covering entire plant. Please note that high mineral content in water may cause some curd like formation due to the presence of fatty acid salts. Though it's not effects field performance

Available in: 100ml, 250ml, 500ml, 1000ml

Pink Panther is a unique product with available natural wide variety of plant chemicals. unique mixed formula refresh and regularize the plant metabolism and support for plant growth. It is a 100% natural product. Pink Panther increases immunisation in plant. It promotes plant growth, induces flowering and thus result in growth and high yields.

Recommended crops: Cotton, Maize, Chilli, Groundnut, Red gram & Other Vegetables.

Usage: 1 ml in 1 litre of water, Spray during morning or evening hours for best result. plant should be drenched thoroughly for effective management of pest.

Direction for use: Mix the suggested quantity in low mineral (soft) water and spray thoroughly covering entire plant. Please note that high mineral content in water may cause some curd like formation due to the presence of fatty acid salts. Though it's not effects field performance

Available in: 100ml, 250ml

Kranthi is new generation bio- rational product of organic origin that have components with Insecticidal properties for crop protection. It is a 100% natural product. Kranthi is an ideal product for enhancing the physiological activity of the plant system in an efficient way to give a long-term protection.

Recommended crops: Cotton, Chilli, Groundnut, Red gram & Other Vegetables.

Usage: 1 ml in 1 litre of water, Spray during morning or evening hours for best result. plant should be drenched thoroughly for effective management of pest.

Direction for use: Mix the suggested quantity in low mineral (soft) water and spray thoroughly covering entire plant. Please note that high mineral content in water may cause some curd like formation due to the presence of fatty acid salts. Though it's not effects field performance **Available in:** 100ml

Astra is new generation bio- rational product of organic origin that have components with Insecticidal properties for crop protection. It is a 100% natural product. Astra is an ideal product for enhancing the physiological activity of the plant system in an efficient way to give a long-term protection.

Recommended crops: Cotton, Chilli, Groundnut, Red gram & Other Vegetables.

Usage: 1 ml in 1 litre of water, Spray during morning or evening hours for best result. plant should be drenched thoroughly for effective management of pest.

Direction for use: Mix the suggested quantity in low mineral (soft) water and spray thoroughly covering entire plant. Please note that high mineral content in water may cause some curd like formation due to the presence of fatty acid salts. Though it's not effects field performance

Available in: 100ml, 250ml

R-9 is an Advance bio technology research which is made by special scientific methods. It contains highly specialized Bio derivatives.. It is a 100% natural product. Radiant increases immunisation in plant. It promotes plant growth, induces flowering and thus result in growth and high yields.

Recommended crops: Cotton, Maize, Chilli, Groundnut, Red gram & Other Vegetables.

Usage: 1 ml in 1 litre of water, Spray during morning or evening hours for best result. plant should be drenched thoroughly for effective management of pest.

Direction for use: Mix the suggested quantity in low mineral (soft) water and spray thoroughly covering entire plant. Please note that high mineral content in water may cause some curd like formation due to the presence of fatty acid salts. Though it's not effects field performance

Available in: 100ml, 250ml, 500ml, 1000ml

Jet An Exclusive, eco-friendly developed under latest organic researched based seaweed, hemic acid, potassium humate carbohydrates, enzymes auxins for maximum and better-quality yield. Jet is a naturally derived plant extract against sucking pest in paddy.

Recommended crops: Paddy, Cotton, Chilli, Groundnut, Red gram & Other Vegetables.

Usage: 1 Gr in 1 litre of water, Spray during morning or evening hours for best result. plant should be drenched thoroughly for effective management of pest.

Direction for use: Mix the suggested quantity in low mineral (soft) water and spray thoroughly covering entire plant.

Available in: 100gm

Arrow is new generation bio- rational product of organic origin that have components with Insecticidal properties for crop protection. It is a 100% natural product. Arrow is an ideal product for enhancing the physiological activity of the plant system in an efficient way to give a long-term protection.

Recommended crops: Cotton, Chilli, Groundnut, Red gram & Other Vegetables.

Usage: 1 ml in 1 litre of water, Spray during morning or evening hours for best result. plant should be drenched thoroughly for effective management of pest.

Direction for use: Mix the suggested quantity in low mineral (soft) water and spray thoroughly covering entire plant. Please note that high mineral content in water may cause some curd like formation due to the presence of fatty acid salts. Though it's not effects field performance

Available in: 100ml, 250ml

Shakthi helps to fight against pest and diseases helps and promotes plant growth. It is zero toxic to plants, animals, human beings since it is an herbal extract. The foliar spray contains the mixture of plant extracts naturally accruing enzymes, vitamins, trace elements and amino acids of plant and animal origin. Shakthi increase yield due to better stimulating phenomena and enhance the nutritional uptake and their utilization which improve colour, shape and taste of crops

Recommended crops: Cotton, Chilli, Groundnut, Red gram & Other Vegetables.

Usage: 2ml -2.5ml in 1 litre of water, Spray during morning or evening hours for best result. plant should be drenched thoroughly for effective management of pest.

Direction for use: Mix the suggested quantity in low mineral (soft) water and spray thoroughly covering entire plant. Please note that high mineral content in water may cause some curd like formation due to the presence of fatty acid salts. Though it's not effects field performance

Available in: 100ml, 250ml, 500ml, 1000ml

Veera An Exclusive, eco-friendly developed under latest organic researched based seaweed, hemic acid, potassium humate carbohydrates, enzymes auxins for maximum and better-quality yield. Veera is a naturally derived plant extract against sucking pest in paddy.

Recommended crops: Paddy, Cotton, Chilli, Groundnut, Red gram & Other Vegetables.

Usage: 1 Gr in 1 litre of water, Spray during morning or evening hours for best result. plant should be drenched thoroughly for effective management of pest.

Direction for use: Mix the suggested quantity in low mineral (soft) water and spray thoroughly covering entire plant.

Available in: 50gm, 100gm, 250gm

Jodi An Exclusive, eco-friendly developed under latest organic researched based seaweed, hemic acid, potassium humate carbohydrates, enzymes auxins for maximum and better-quality yield. Jodi is a naturally derived plant extract against sucking pest in paddy.

Recommended crops: Paddy, Cotton, Chilli, Groundnut, Red gram & Other Vegetables.

Usage: 1 Gr in 1 litre of water, Spray during morning or evening hours for best result. plant should be drenched thoroughly for effective management of pest.

Direction for use: Mix the suggested quantity in low mineral (soft) water and spray thoroughly covering entire plant.

Available in: 125gm, 250gm

Nakshatra an Exclusive, eco-friendly developed under latest organic researched based seaweed, hemic acid, potassium humate carbohydrates, enzymes auxins for maximum and better-quality yield. Nakshatra is a naturally derived plant extract against sucking pest in paddy.

Recommended crops: Paddy, Cotton, Chilli, Groundnut, Red gram & Other Vegetables.

Usage: 1 Gr in 1 litre of water, Spray during morning or evening hours for best result. plant should be drenched thoroughly for effective management of pest.

Direction for use: Mix the suggested quantity in low mineral (soft) water and spray thoroughly covering entire plant.

Available in: 125gm, 250gm

SIXER with its unique formula effectively manages various diseases like Blast, Leaf spot, Powdery Mildew, Early Blight, Fungal Leaf Blight etc. on Paddy, Potato, Tomato, Grapes, Mango, Pomegranate, Papaya, Vegetables. The Product has undergone successful bio-efficacy studies.

Usage: 2 ml in 1 litre of water, Spray during morning or evening hours for best result. plant should be drenched thoroughly for effective result.

Recommended crops: Cotton, Maize, Chilli, Paddy, Groundnut, Red gram & Other Vegetables.

Direction for use: Mix the required quantity thoroughly in sufficient amount of water and spray on both sides of the leaves affected areas.

In cases of high-water hardness, good quality surfactant is advisable for better solubility.

Available in: 125gm, 250gm

F-cure with its unique formula effectively manages various diseases like Blast, Leaf spot, Powdery Mildew, Early Blight, Fungal Leaf Blight etc. on Paddy, Potato, Tomato, Grapes, Mango, Pomegranate, Papaya, Vegetables. The Product has undergone successful bio-efficacy studies.

Recommended crops: Cotton, Maize, Chilli, Paddy, Groundnut, Red gram & Other Vegetables.

Usage: 2 ml in 1 litre of water, Spray during morning or evening hours for best result. plant should be drenched thoroughly for effective result.

Direction for use: Mix the required quantity thoroughly in sufficient amount of water and spray on both sides of the leaves affected areas.

In cases of high-water hardness, good quality surfactant is advisable for better solubility

Orient is a naturally derived botanical product. Which improve number of tillers and vigorous plant growth. It increases resistance power against stem borer and leaf folder. unique Extract from seaweed and animal origin for optimum crop yield & quality, increases tolerance of crops to biotic and abiotic stress, eco safe being, biodegradable, compatible with all Fertilisers.

Orient provide balanced nutrition for optimum growth promotion through availability of required enzymes, micronutrients, optimum metabolite formation enhance germination of seeds, extends root and shoot development, increase flowers and fruit setting improve size, colour, flavour of the produce & increases the yield.

Recommended crops: Paddy, Cotton, Maize, Chilli, Groundnut, Red gram & Other Vegetables.

Dosage: 4 kg of Orient per Acre. Before 20 days after transplanting and panicle initiation stage.

Alpha is a naturally derived botanical product. Which improve number of tillers and vigorous plant growth. It increases resistance power against stem borer and leaf folder. unique Extract from seaweed and animal origin for optimum crop yield & quality, increases tolerance of crops to biotic and abiotic stress, eco safe being, biodegradable, compatible with all Fertilisers.

Alpha provide balanced nutrition for optimum growth promotion through availability of required enzymes, micronutrients, optimum metabolite formation enhance germination of seeds, extends root and shoot development, increase flowers and fruit setting improve size, colour, flavour of the produce & increases the yield.

Recommended crops: Paddy, Cotton, Maize, Chilli, Groundnut, Red gram & Other Vegetables.

Dosage: 4 kg of Orient per Acer. Before 20 days after transplanting and panicle initiation stage.

BHUSHAKTHI GRANULERS: A unique Extract from seaweed and animal origin for optimum crop yield & quality, increases tolerance of crops to biotic and abiotic stress, eco safe being, biodegradable, compatible with all pesticides & Fertilisers. BHUSHAKTHI GRANULERS provide balanced nutrition for optimum growth promotion through availability of required enzymes, micronutrients, optimum metabolite formation enhance germination of seeds, extends root and shoot development, increase flowers and fruit setting improve size, colour, flavour of the produce & increases the yield.

Recommended crops: Paddy, Cotton, Maize, Chilli, Groundnut, Red gram & Other Vegetables.

Dosage : 2kg of BHUSHAKTHI GRANULERS per Acer.

BHUMIPUTRA GRANULERS: A unique Extract from seaweed and animal origin for optimum crop yield & quality, increases tolerance of crops to biotic and abiotic stress, eco safe being, biodegradable, compatible with all pesticides & Fertilisers.

BHUMIPUTRA GRANULERS provide balanced nutrition for optimum growth promotion through availability of required enzymes, micronutrients, optimum metabolite formation enhance germination of seeds, extends root and shoot development, increase flowers and fruit setting improve size, colour, flavour of the produce & increases the yield.

Recommended crops: Paddy, Cotton, Maize, Chilli, Groundnut, Red gram & Other Vegetables.

Dosage : 5 kg of BHUMIPUTRA GRANULERS per Acer.
